

Dear National OT Registration Board,

I understand that at present there is a proposal for 30 hours of CPD per year, and would like to provide some feedback regarding this.

I feel very strongly that 30 hours per year is ideal many ways, however would not be realistic for a majority of occupational therapists. I believe that for a more modest CPD loading would be appropriate; 20 hours per year - similar to that of physiotherapy.

I look forward to hearing an update after the consultation process.

Yours sincerely,

E. Lawrence
