

Hello!

This is to bring to your notice that kindly make necessary amendments in English language. The present criteria of scoring 7 in IELTS academic is not realistic, because in my viewpoint the best way to learn any language is by living in that country & not in his country of residence . Yes, you should look whether one has completed his degree of OT in English or not & then give him sufficient time to take IELTS & complete registration formalities. But first allow him to immigrate. Look at his OT degree , transcript, experience & qualification from wfo recognised colleges etc. Instead concentrating on language score of 7.Hope to see this change on your www soon so that your country can attract maximum OT from other part of the world.

Thanks

Kind Regards

S. Azad
